Deep, Rich & Luxurious Colors that Last Thanks to **Advanced Level Protection**

Love bold, dark colors? We do too. Now you can confidently choose vinyl siding in the deepest, darkest hues. With our advanced SolarDefense Reflective Technology™, your home's colors will stay vibrant for years to come. Plus, advanced heat-dispersing technology and a stronger, heat-resistant base layer add distortion-free strength and durability.

Top layer disperses heat and helps resist fading by allowing light energy to flow both ways.

Cooling compound scatters light, reflecting heat away, keeping panels cooler.

Base layer stands up to heat, preventing distortion.

Warrantied against (i) fade in excess of a Delta E of 1 Hunter unit and (ii) heat distortion from normal climate conditions or normal reflective light sources. See product warranty for details and terms and conditions.

THE BEST PROTECTION FOR BOLD COLORS

Engineered to absorb less of the sun's heat, our darkest colors are designed to resist fading and heat distortion better than ever. Our tough UV-stable polymer stands up to damaging rays. New cooling compounds scatter more light to reflect more heat away from the siding and keeps panels cooler even on the hottest days.

Why choose **SolarDefense?**

Gorgeous Dark Colors

SolarDefense Reflective Technology is so effective at protecting against the sun's rays, you can choose among our boldest, darkest colors.

Protection Against Heat

Reflective materials help prevent heat absorption and distortion.

Protection Against Fading

Tough UV-stable polymer resists chemical breakdown and reflects damaging rays.

Designed for Durability

Outer surface, color pigments, and substrate are molecularly bonded to create a durable, long-lasting panel.

Easy to Maintain

Just soap and water cleanup. Never needs painted, caulked or patched. Unlike wood, it won't peel, crack or rot.
